

Company Environmental Policy

Scott Cables Ltd operate an Environmental Management System (EMS) that is built on the foundational principles of BS EN ISO14001.

Scott Cables Ltd are committed to minimising our impact on the Environment through our business operations and activities. Wherever possible, Scott Cables Ltd positively contributes to the UK's environmental performance through product design and manufacturing innovation to improve operational efficiencies and reduce the impact upon the environment.

Scott Cables Ltd's environmental policy promotes and focuses on:

- Understanding and applying environmental legislation and regulations
- Determining our impact on the climate and taking measures to reduce where possible
- Prevention and control of pollution, including reduction in the generation of greenhouse gases
- Reducing waste, increasing recycling and ensuring waste disposal is conducted responsibly and legally
- Using sustainable resources, reducing reliance on natural resources and monitoring energy consumption levels
- Ensuring that robust emergency procedures are in place to address environmental incidents should they arise, in quick and effective ways

We recognise that success in achieving the intent of this Environmental Policy is reliant on high levels of awareness and collaboration across our interested parties, including employees, suppliers and customers. Scott Cables Ltd's management team are committed to ensuring such awareness and collaboration is in place.
